

Cymbal[®]
metal fashion elements

www.cymbalbeadsmith.com

Design by Carole Ohl

Cymbal is a unique, imaginative, and groundbreaking family of metal elements to fit and integrate with the most popular beadworking beads in the market. These include Czech GemDuo, SuperDuo®, Silky Beads®, Honeycomb, Paisley Duo®, Ginko®, Kite and Chevron Duo beads, as well as Miyuki® Tila®, 11/0 Delica Beads® & Rounds and 8/0 Round seed beads.

Cymbal Metal Fashion Elements® have different functions:

BAILS are ready-to-bead metal elements designed to integrate into a piece of beadwork and then accommodate a rope, cords, or chain. Their diameter will accommodate multi strands, cords of varied thickness or a beaded kumihimo rope.

CONNECTORS can serve as links and extensions to your project. They add the richness of metal and create a mixed media effect.

BEAD ENDINGS serve as clasps or endings to attach clasps. They are shaped and spaced to the specifications of a specific bead.

BEAD SUBSTITUTES are metal elements created in the shape of a specific bead to be stitched into a project just like the bead itself. Bead Substitutes add shine, glitter and pop wherever they are used.

EARRINGS are ready-to-bead metal post components. They are perfectly fashioned for your favorite shaped beads. Earring posts are made from hypoallergenic titanium.

MAGNETIC CLOSURES feature a sleek design and a durable way to keep your jewelry secure. They are suitable for making multi-strand pieces and the magnet provides a functional option for adding and removing jewelry with ease.

PENDANT SETTINGS are simple to customize, metal pendants. Affix beads with adhesive inside these bezel elements (viscous glue suggested) to wear alone or as elements or charms in any designs.

SIDE BEADS give metal definition to the edge of a bead component or design.

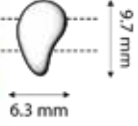

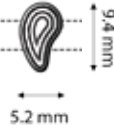

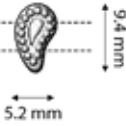

TOGGLES are an elegant finish to any bracelet or necklace. To use, insert the bar into the circle vertically and then adjust to rest horizontally. The bar acts as a lock and can only be removed when you readjust the bar back through the circle.

Experienced bead workers will have a fun and exciting time discovering new ways to use Cymbal metal fashion elements®.

Cymbal
metal fashion elements

The reaction to this collection has been fantastic! Please note that the Cymbal line has a MAP price policy. We are happy to share downloadable product images and logos as well as support our resellers with projects to create classes. We will also offer free project giveaways for the promotion of this line. We encourage the use of the Cymbal Metal Fashion Elements® logo in your advertisements and website.

DISCLAIMER:

Dimensions represented for Cymbal Metal Fashion Elements® have average size tolerance of approximately $\pm 4\%$. Holes sizes may fluctuate between 0.8-0.9 mm.
